Baies Aziz

Full Stack Software Developer

703-843-3528 | baisaziz.232@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Full Stack Software Developer specializing in frontend development with expertise in React, JavaScript, HTML, and CSS. With experience as a translator for the US embassy, I have robust communication skills. I have front-end knowledge in designing scalable solutions and integrating backend functionality with Python and Flask. Committed to continuous learning and delivering user-centered software that enhances digital engagement.

Software Skills

Programming Languages: JavaScript, HTML5, CSS3, Python

Frameworks/Libraries: React, Flask

Databases: SQL

Tools/DevOps: Github, RESTful APIs

Certifications: Coding Temple - Full Stack Software Engineer https://www.credential.net/profile/baiesaziz278290/wallet#gs.hivu1h

---

Project Completed

Regalooo – Online Gifting Platform View Project

- Developed the frontend using React, Redux, and Tailwind CSS, enabling users to send gifts via email without requiring recipient addresses, creating a seamless user experience.
- Integrated Axios for efficient API communication, ensuring seamless data exchange between the frontend and backend services, which enhanced performance.
- Implemented features for customizable gift selection, secure email notifications, and real-time updates on gift acceptance, significantly improving user engagement and satisfaction.
- Collaborated with backend developers utilizing Flask and PostgreSQL to ensure secure data flow while maintaining a responsive design that works across all devices.

Experience

Software Engineer Trainee: Coding Temple

DEC 2023 - SEP 2024

- Designed and developed full-stack applications utilizing React and Flask, implementing core coding principles to create efficient, user-friendly, and scalable solutions that meet project requirements.
- Adapted swiftly to emerging technologies and programming languages under tight deadlines, showcasing exceptional problem-solving abilities and a commitment to continuous learning and professional growth.
- Collaborated effectively within a team environment to integrate third-party APIs into a group project, demonstrating strong teamwork, communication skills, and the ability to achieve project objectives collaboratively.

Administrative Coordinator: PAE (Pacific Architect and Engineers) | Kabul, Afghanistan

MAR 2019 - DEC 2021

- Provided comprehensive interpretation and translation services during meetings, effectively facilitating communication between U.S. contractors and local stakeholders, ensuring clarity and understanding of project objectives.
- Managed critical documentation and data entry processes, demonstrating exceptional organizational skills and maintaining high standards of accuracy and compliance with program requirements.
- Acted as a liaison among diverse teams, offering cultural insights that enhanced collaboration and project effectiveness within the National Maintenance Strategy-Ground Vehicle Support (NMS-GVS) Program.
- Consistently supported the U.S. Department of Defense mission by delivering valuable insights and reliable service, contributing to the overall success of operations while prioritizing the safety and security of personnel.

Project Monitor: Chechhi and consulting,Inc | Kabul, Afghanistan

MAR 2016 - DEC 2018

- Directed Third-Party Monitoring (TPM) under the USAID-funded SUPPORT-II project, driving significant improvements in program efficiency and effectiveness through robust reporting mechanisms.
- Executed comprehensive monitoring of USAID-funded initiatives in the East region of Afghanistan, focusing on meticulous data collection and thorough project progress evaluations to ensure accountability and transparency.
- Facilitated effective communication between international project teams and local communities through expert interpretation services, ensuring a clear understanding of project objectives and community needs.
- Prepared and presented detailed reports to senior management, effectively aligning project activities with organizational goals and contributing to strategic decision-making processes.

Education

Coding Temple, *Certificate in Software Engineering*
Kabul University, *Bachelor in Computer Science*
